CAREER OBJECTIVE

As a developing student, I aim to apply programming knowledge and experience from freelance web projects and indie games to build a solid foundation. My long-term goal is to pursue a career in the field of **cybersecurity**, specializing in offensive security and **ethical hacking**.

WORK EXPERIENCE

Web Developer (Freelance)

Period: Sep 2025 – Present

Description:

- Built and developed a personal portfolio website using **Astro**, focusing on high performance and optimal user experience.
- Integrated **Strapi** as Headless CMS for flexible and efficient blog content management.
- Configured and deployed the application on **VPS** (virtual private server) using **Nginx** for stable and secure hosting.
- Implemented real projects on the portfolio to showcase Front-end programming skills (HTML, CSS, JavaScript) and API integration.
- Project Link: <https://jokholk.dev>

Team Lead (Game Project)

Period: Jul 2025 – Aug 2025

Description:

- Led and managed a team of 3 programmers to develop the game **Rogue Adventure**, a 2D pixel-art platformer game.
- Analyzed tasks, ensured progress, and supported technical issue resolution for team members.
- Directly developed core features of the game such as character control system, attack logic, enemy movement, and level logic.
- Ensured project completion on schedule and quality, while maintaining close coordination among members.

Web Freelancer

Etugi Binh Duong

Period: Sep 2024 – Oct 2024

Description:

- Designed and built the entire user interface (UI) for the website using HTML and CSS3.
- Used JavaScript to develop interactive features like shopping cart, contact form, and visual effects to enhance user experience.
- Built a responsive design interface, ensuring the website displays well on all devices.
- Ensured the website has clean, maintainable code structure and good compatibility across different browsers.
- Delivered a complete, stable product meeting customer requirements.
